

PD6662:2010 Compliance

Product Availability

The vast majority of Texecom's product portfolio has been updated over the past few months with major changes being introduced in March, April and May. All part codes for Texecom products have remained the same so distributors benefit by automatically receiving the latest versions of Texecom products as they become available.

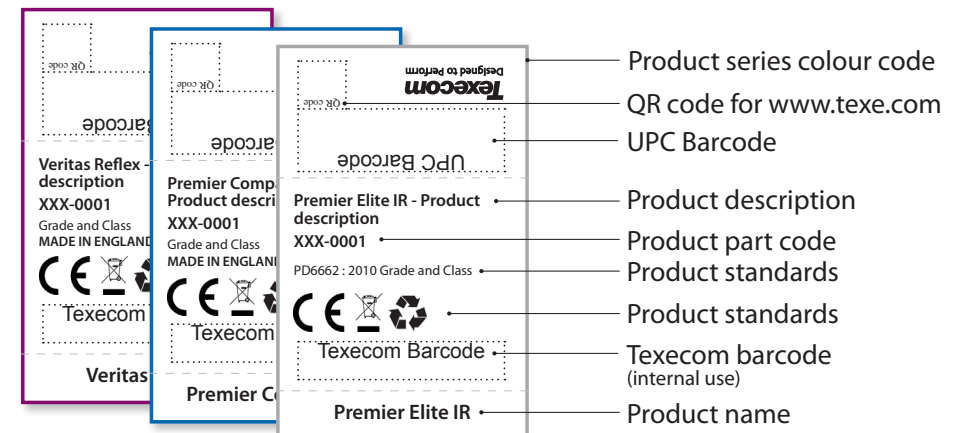

Product name changes

Texecom has rebranded its products into three different categories to make it easier for customers to identify the most suitable product for a particular application. The three categories are 'Premier Elite', 'Premier' and 'Veritas' series.

This has resulted in the following name changes:

- Premier control panels name changed to Premier Elite control panels.
- Prestige detectors name changed to Premier Elite detectors.
- Odyssey bell boxes (twin piezo versions) changed to Premier Elite Odyssey bell boxes.
- Odyssey E bell boxes (single piezo versions) changed to Premier Odyssey E bell boxes.
- Reflex and Medusa detectors names changed to Veritas Reflex and Veritas Medusa detectors, respectively.

All new versions of Texecom's products are easily identifiable by a new colour coded labelling system. Premier Elite products feature grey outlined labels, Premier products feature blue outlined labels and Veritas products feature purple outlined labels.

PD6662:2010 Compliance

Product Enhancements

New Texecom products feature the following performance enhancements:

- Premier Elite control panels now feature energy efficient switch mode power supplies. Metal panel versions come complete with 2.5A power supplies as standard, plastic housing versions contain 1.5A power supplies.
- Premier Elite power supplies have also been upgraded to switch mode, increasing performance from 2.0A to 2.5A.
- Premier Elite control panels have increased user codes.
- Premier Elite 24 has been upgraded to two areas.
- Premier Elite 640 upgraded to 64 true areas.
- Premier Elite Odyssey bell boxes now include a battery test function.

Product Grading

Due to the introduction of new product specific EU standards, some Texecom products now have reclassified EN grading. Key changes include:

- Premier Elite Odyssey bell boxes remain Grade 3
- Premier Odyssey E bell boxes are now Grade 2
- Premier Impaq Glass Break is now Grade 2
- Premier Impaq Plus is now Grade 2
- Veritas Impaq E is now Grade 2

Summary

Texecom believes that compliance to regularity standards is a minimum requirement for all Texecom products. Complete control over the design and manufacture of all its products, right here in the UK, has made it possible for Texecom to make these enhancements across the entire Texecom portfolio.
